

The image features a large, white, stylized logo consisting of the letters 'HI' in a bold, blocky font. Below the logo, the words 'HAMPTON ICE' are written in a smaller, white, sans-serif font. The background is a vibrant blue sky above a clear turquoise ocean with white foam from waves breaking on a sandy beach. The bottom portion of the image is a solid, light brown color.

HAMPTON ICE COMPANY OVERVIEW

Most packaged ice is frozen tap water. Hampton Ice is purified through reverse-osmosis, UV-light, and alkaline enhancement delivering increased clarity, slower melting, cleaner taste, and better hydration unmatched in the industry. Hampton Ice represents a new standard, ice built for premium beverages and premium environments.

Until now, ice has been a commodity supplied by anonymous industrial operators with no identity, no presence, and no cultural relevance. In the history of this category, no one has built an ice brand that people actually know, trust, or care about. Hampton Ice is not just an ice company. It is the first ice brand. Period.

Founded in 2022 in Southampton, Hampton Ice set out to do what every major consumer category eventually demands, create a brand where none existed. In four years, Hampton Ice has become the trusted choice for leading restaurants, private estates, marinas, luxury events, and private aviation across the Hamptons, a market where expectations are high and tolerance for failure is zero.

That standard has translated to trust and placement. We are the exclusive ice partner for East Hampton Airport, serving the region's most influential travelers. In 2025, we expanded our footprint across the Hamptons' highest-profile events, from the Palm Tree Festival at Shinnecock to YesChef's culinary experiences, providing specialty formats for private estates and select hospitality partners.

With expansion underway in Miami, our approach remains deliberate, build the first ice brand in the markets that define taste, hospitality, and leisure.

We have proven the model in the Hamptons and are now executing the same playbook in Miami with the same discipline, infrastructure, and product standard.

MOST ICE IS FROZEN TAP WATER.

HAMPTON ICE IS FILTERED.

RO+UV+ALKALINE.

Increased clarity, slower melting, cleaner taste, better hydration.

Hampton Ice. What a life.

HAMPTON ICE PRODUCTS

@GETHAMPTONICE

PACKAGED ICE

Hampton Ice delivers crystal clear, cloud free, reverse osmosis, UV light, alkaline enhanced full size cubes packaged in 8lb, 20lb, and 50lb increments. Our full size cubes assure slower melting and thus help preserve the integrity of drinks.

SPECIALTY ICE

Hampton Ice offers crystal clear, cloud free, reverse osmosis, UV light, alkaline enhanced specialty ice in bulk including ice spheres (2"), ice squares (2"), and Collins (5"x1.25"). Contact us for bulk rates.
